

355ci

A top performer with a truly smart design.

Colour does not have to be expensive, but it must be good! Those with high personal and document output standards cannot go wrong with the 355ci A4 colour multifunctional system. This system effortlessly masters the basics of modern everyday office needs: colour and black/white; copying, printing, scanning, faxing and stapling*; mobile printing and scanning; printing confidential documents and much more – performance you will come to rely on! Do not be fooled by its discreet anthracite high-tech look: This system is powerful.

What you can expect:

Always ready to go: The 355ci features brilliant colour rendering and can process an impressive 35 A4 pages per minute for copying and printing, and up to 60 A4 image pages per minute for scanning. Its underlying motto is: Don't wait, get started! Even if the colour toner should run out, you can still print up to 50 more pages in black/white.

Whether you are in the office or on the go – the 355ci is reliably at your side. The Mobile Print app lets you print from your smartphone or tablet, scan documents to the cloud or even access the control panel of the multifunctional system. Thanks to the HyPAS interface, the 355ci also offers numerous useful apps* that make work easier for you, such as PinPoint Scan for directly scanning to your personal PC folder or for sending scans via e-mail.

Small or large, thick or thin – it does not matter! The 355ci processes formats from A6R to A4 and paper weights of 60–200 g/m². Up to five paper feeds allow you to keep various media ready to go at all times – from normal paper to heavy paper, to letterhead, envelopes, labels and even pre-printed forms or certificates. You will be prepared for all eventualities.

The system is also a clever money-saver: You can save a lot of paper with the duplex function for double-sided printing as well as intelligent functions such as 'skip blank pages,' which automatically detects and eliminates empty pages during scanning and copying, or 'ID Card Copy', which copies both sides of a small-format original onto the front of one sheet. You can thereby effectively reduce your paper consumption, protecting the environment and your budget!
