

Digital Security is Essential

■ When a business is hacked, incurred costs quickly increase

A cyberattack costs a business an average of:

18,900 €
per day*

Cost of successful cyber attacks against IT infrastructure companies worldwide:

2.5 Mio. €
per year

LDamages caused by industrial digital espionage, sabotage and data theft estimated in Germany alone:

51 bn. €
per year

* Conversion from dollar to euro based on 01/10/2015 exchange rate

*Representation not to scale

■ Number of cyber attacks worldwide have increased sharply since 2015

3 times more

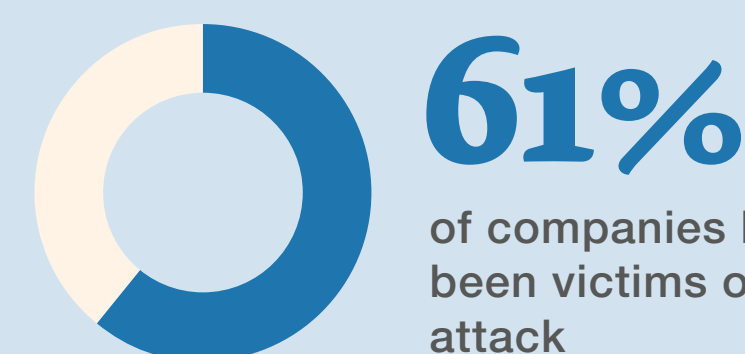

IT security incidents since 2014

Only

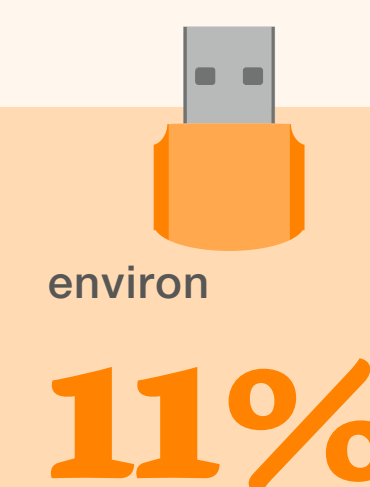

1 company out of 3

has an IT security concept for their entire structure

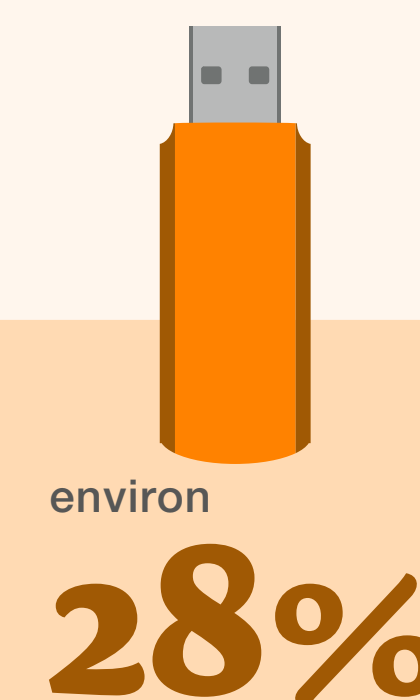

■ Companies often underestimate the problem

Number of companies where "increasing data security" is the most important IT subject in the 3 coming years:

Percentage of companies that train employees on security:

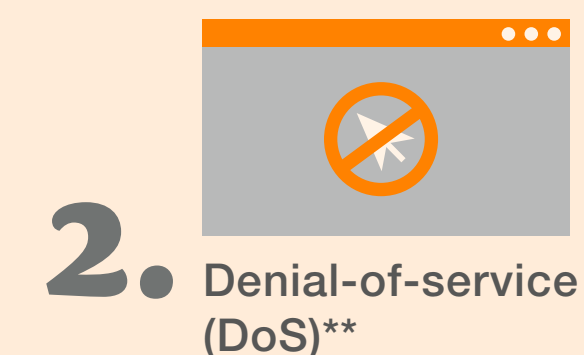

■ The biggest danger is hidden internally.

Half

of IT crimes come from the inside

■ Which cyber attacks are the most expensive?

** Denial-of-Service (DoS) attacks aim to disable a server by sending numerous requests
