

P-5536i MFP

This system is truly something special !

This is not just extraordinarily fast; this is also extraordinarily good: Alongside impressive speeds, the P-5536i MFP also boasts 1,200 x 1,200 dpi resolution, extensive standard features including a large touch display, and cutting-edge security and mobility functions. Additionally, the integrated HyPASTM interface makes it possible to use a range of different HyPAS applications, as well as to incorporate customer-specific software solutions that will make your work day easier over the long term – an exceptional system for the exceptional expectations you face.

What you can expect:

Extra efficiency: Whether you need to print, send or archive large volumes of documents, the P-5536i MFP can handle the job with ease. This system prints and copies at lightning-fast speeds of up to 55 A4 pages per minute, and they even scan up to 120 image pages per minute in duplex mode. The standard dual-scan feed not only protects your valuable originals; with the continuous scan function, it can also process more than 100 master documents in one operation.

Unparalleled mobility: The free Mobile Print app for Android and Apple iOS-compatible devices is also available for mobile printing and scanning via smartphone or tablet. The optional wireless card additionally supports the Apple AirPrint protocol and Wi-Fi Direct. Naturally, you can also take the conventional route, integrating the system into your network or operating them via USB.

Highly secure: This system effectively protects your sensitive data from access by unauthorised parties. You can use the 'private printing' function to assign a proprietary password to a print job, or you can use the card reader* in connection with the Card Authentication Kit to identify individual users. If the system is equipped with an optional hard drive, the Data Security Kit* will protect the data on it in accordance with international security standards.

Incredibly extensive: The wide-ranging standard features include a dual scan feed and 500-sheet universal cassette and can be easily expanded at any time. Up to four optional 500-sheet cassettes, an additional 250-sheet output tray and a manual stapler for 20 sheets are available, allowing you to tackle major print jobs quickly and professionally at all times. And the finishing touch is the Scan Extension Kit* for creating text-searchable PDF files.
