

5057i / 6057i

Increase your productivity while doing less.

The tasks you have to complete every day in the office are becoming increasingly extensive, demanding and complex. This makes it easy to get bogged down under pressure. With one of our new 5057i or 6057i multifunctional systems, however, your productivity will power ahead. These systems take a load off your plate at work so you can put your energy into other projects. The new systems are hard to beat in terms of speed, quality, flexibility and safety. And then there's the icing on the cake: the capacity to create first-class, ready-to-use leaflets and hand-outs – hole-punched, stapled and folded just as you like!

Your benefits

Truly efficient: The systems feature output speeds of 50 and 60 pages per minute respectively. Original documents can be scanned and digitised at a rate of up to 220 images per minute, at 300 dpi in colour and b/w. The print quality is 1,200 x 1,200 dpi. The paper feeder holds up to 7,150 sheets in formats from A6R to SRA3 and paper weights from 52 to 300 g/m². Tailor your finishing according to the project: The finisher holds up to 4,000 sheet and can staple, hole-punch and even create brochures*.

Less is more: Using less paper is good, not only for your company budget, but also for the environment. Functions such as duplex printing and automatic skipping of blank pages underscore this line of thinking, saving resources such as paper, toner and time in your everyday workflows. Moreover, improved TEC values, low noise emissions and less waste thanks to durable components also make for a positive environmental balance. We're always thinking ahead.

The advantages of variety: If you want to keep up in the fast-paced working world, you need to be flexible. The 5057i and 6057i stand out in this regard. Starting with the new colour touch panel with its 10.1 inch screen and customisable function keys for better usability, the HyPAS is able to integrate external software solutions up to a professional finishing that leaves nothing to be desired.

Protection is a must: Security in office communication is a major challenge these days. That's why our Data Security Kit is already part of the standard package. This security solution protects your confidential information: it overwrites and encrypts copy, scan and print data even before it's saved to disk. In addition, the memory area for output data is automatically wiped clean, preventing it from being restored.
