

Subject: Compare at a glance two versions of the same document, regardless of format, with FineReader 14

Compatible models: The entire TA Triumph-Adler MFP range

Presentation / positioning

Find the differences in the text of two versions of the same document regardless of their format. For example, compare a signed contract that has been scanned (in PDF or as an image) to its original in Word.

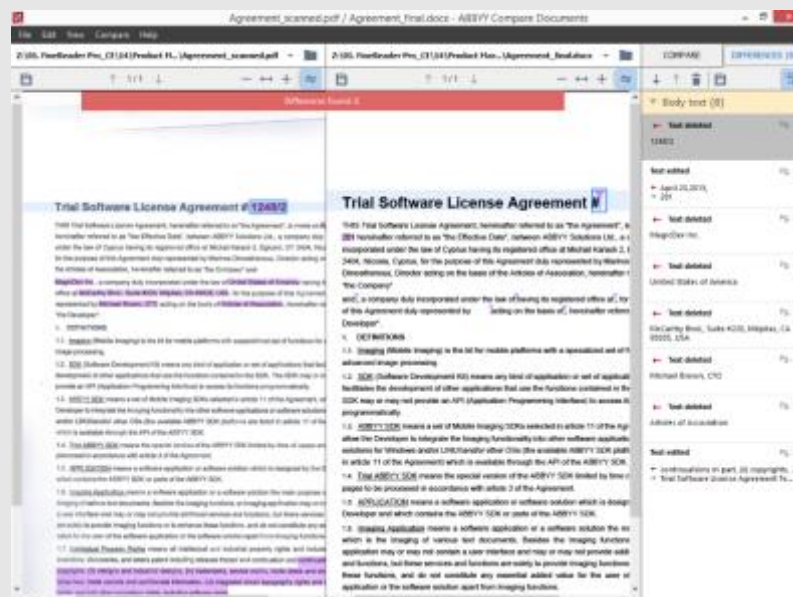

How?

1 Compare documents in different formats:

- Compare documents in formats Microsoft® Office (Word, Excel®, PowerPoint®), PDF, paper scans.
- 35 languages: Comparison of multilingual documents.

2 Find the differences

- Intuitive navigation over identified changes, which are highlighted in the documents compared.
- Quickly identify major changes, reviewing only changes in text (not formatting or layout).

3 Save and Share Results

- Export the results of the comparison as comments in a PDF.
- Export the results of the comparison in Word format.

Advantages

- Faster and more reliable than line-by-line visual verification
- Rapid detection of major changes between different versions of a document
- Comparison of documents in different formats (eg the final version of a contract text in Word with the signed and scanned version, sent by e-mail by your partner).

Main benefits

- Considerable time saving
- No more error or forgetting: the changes are immediately highlighted
