

Subject : SECIB EXPERT connector

Compatible with all Triumph Adler
HyPAS MFPs

Presentation

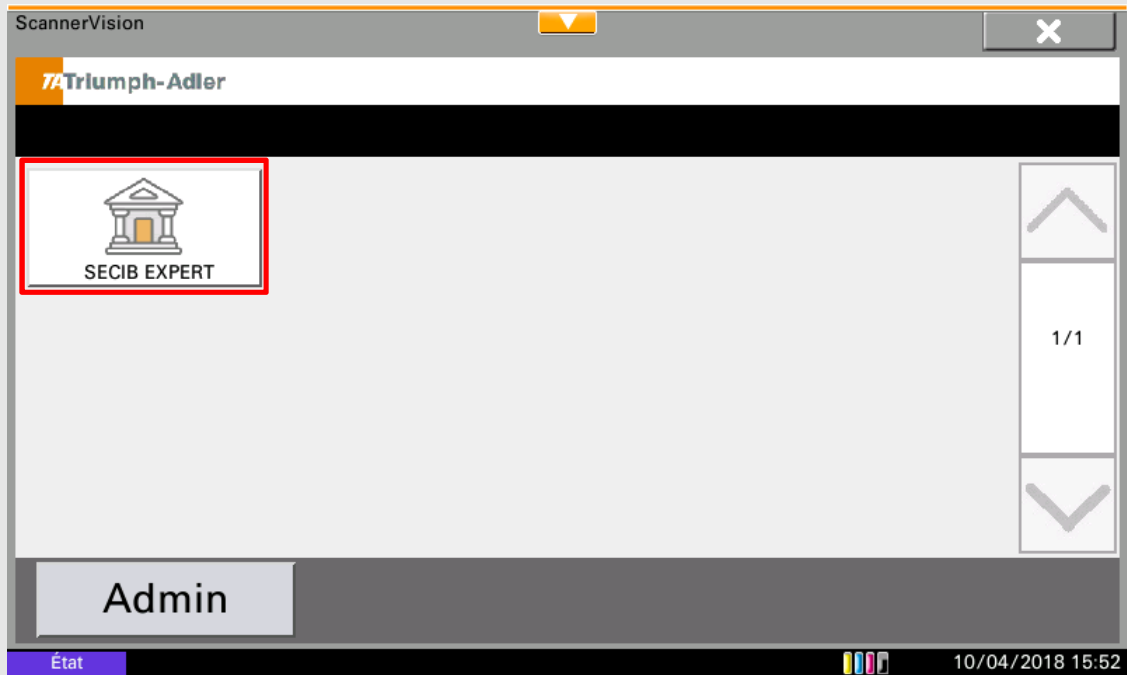

TA Triumph-Adler is pleased to inform you of the availability of its SECIB EXPERT connector from the HyPAS ScannerVision application. SECIB EXPERT is a business software widely used by lawyers. This connector allows an optimal integration of our MFP and our solutions for this privileged target.

How ?

1. Launch the scan application from the MFP screen :

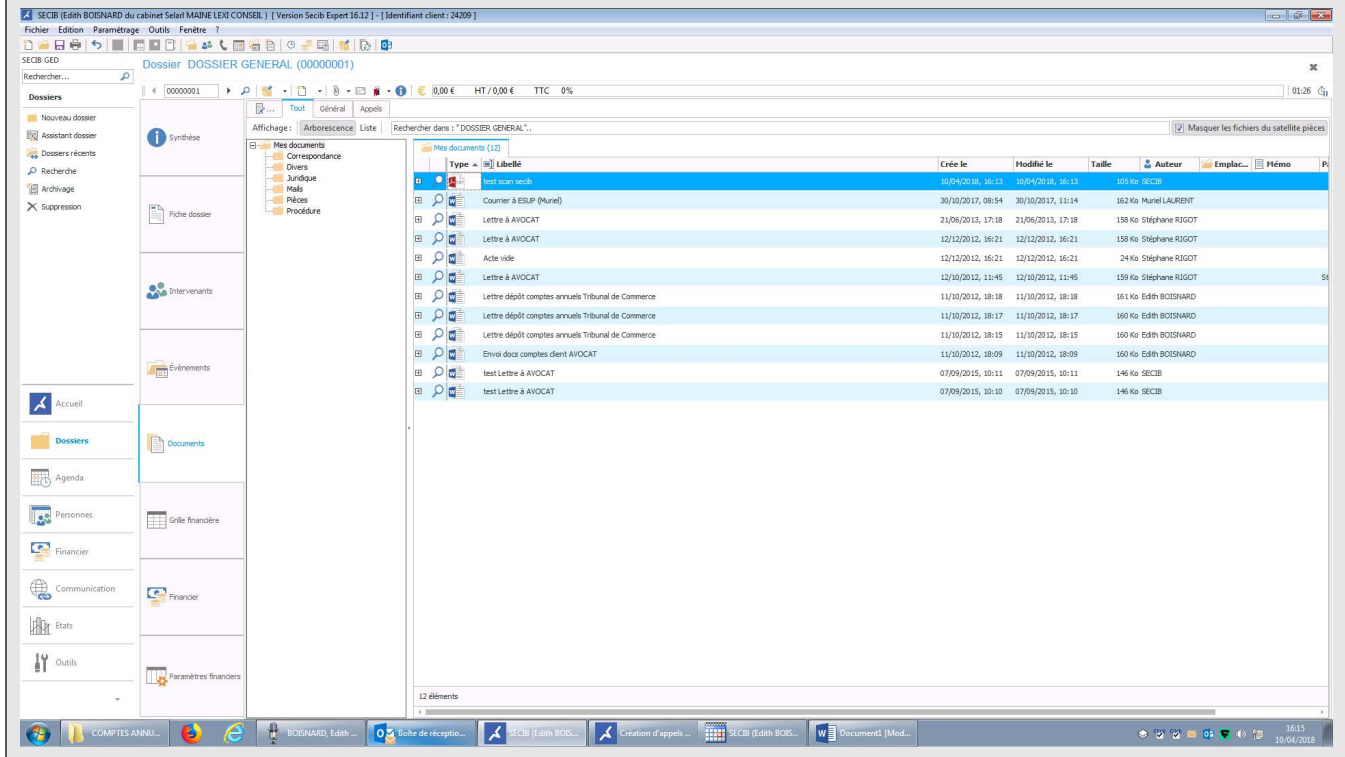

2. Select the SECIB EXPERT profile to scan to your business application.

3. After selecting the client, folder, label, and rename your file, the document will be ready to be scanned by pressing the Start key.

4. Once on SECIB EXPERT, you can view the scanned document in the corresponding client file.

Main benefits for lawyers :

- Time saving: Document mass processing directly from the control panel of the TA Triumph-Adler multifunction system
- Fluid flow of information, while maintaining a high level of security
- Increasing productivity: automating workflows and streamlining document processes

Advantages for lawyers :

- Indexing and document scanning directly in the Secib Expert customer folder
- Search a client file by name or by number to attach a new scanned item
- Choosing the label and assigning a title to the scanned document before attaching it to the selected client file
- Document processing by the ScannerVision solution, then routing in PDF / A (text) format
- View from SECIB EXPERT, the document in the corresponding customer folder.
