Machine

This chapter explains the names of parts when the machine is used as a fax machine.

For the parts required when functions other than FAX are used, refer to the machine's *Operation Guide*.

* The operation panel may differ from the above illustration depending on the type of your machine.

1	Operation panel	Perform the fax operation with this panel.
2	Main power switch	Set this switch to the ON (I) side when performing the fax or copier operation. The touch panel lights to enable operation.
3	MP (Multi Purpose) tray	Set the paper in this tray when using a type of paper other than the cassette (e.g., when using special paper).
4	LINE connector (L1)	Connect the modular cord for the telephone line to this connector. This connector is Port 1.
5	LINE connector (L2)	If you install 2 optional FAX Kits (Dual FAX option), you can use Port 2. Connect the modular cord for the telephone line to this connector.
6	TEL connector (T1)	When using a commercially available telephone set, connect the modular cord to this connector.

IMPORTANT: You cannot automatically receive a fax when the main power switch is turned off. To receive faxes with the power turned off, press the **Power** key on the operation panel.
