

P-4531i MFP/ P-4536i MFP

Quality or quantity? Why not both?

These days, you no longer have to choose between quantity and quality. Our two black and white multifunctional systems, P-4531i MFP and P-4536i MFP, offer the perfect combination of these two attributes – and many more! In addition to high output speed and an impressive resolution of 1,200 x 1,200 dpi, these systems deliver versatility, productivity and user-friendly operation. The large, easy-to-use colour touch screen allows users to control quality and quantity, alongside a broad range of intelligent functions that will simplify your day-to-day work. It's all at your fingertips!

What you can expect:

Intuitive: The user-friendly aspects of the P-4531i MFP and P-4536i MFP aren't just limited to the adjustable, approximately 18-cm touch panel; they are most noticeable in the standard HyPASTM interface for integrating optional customer-specific software solutions and applications. The optional Scan Extension Kit to automatically create text-searchable PDF files is yet another helpful feature. You can configure your system exactly as you need it.

Versatile: The systems offer a wide range of intelligent functions, including 'skip blank pages' or 'ID card copy' for copying double-sided master documents in small formats that will subsequently be combined onto one page and printed. But that's not all: Mobile printing and scanning via the free Mobile Print app and printing via Apple AirPrint* or Wi-Fi* round off the package.

Productive: The first page starts after just 5.9 seconds, and the system prints and copies at a speed of 45 A4 pages per minute. Thanks to the large paper capacity of max. 2,600 sheets, it will be a long while before the P-4531i MFP and P-4536i MFP run out of steam! The system also boasts impressive performance, capable of scanning up to 60 image pages per minute.

Economical: Alongside all this functionality and productivity, the P-4531i MFP and P-4536i MFP also feature clean lines, whisperquiet operation and a compact, space-saving design. And the system even meets the strictest requirements in terms of energy efficiency – that's good for your budget, and the environment!
